## Education

### Wrocław University of Economics and Business

Wrocław, PL

MASTER OF SCIENCE

October 2023 – Until now

Computer Science in Business, Specialization: Big Data

### Wrocław University of Science and Technology

Wrocław, PL

BACHELOR OF SCIENCE

October 2016 – February 2020

Environmental Engineering, Specialization: Water supply, wastewater disposal and waste management. Thesis topic: Conceptual design of the city's water supply system in the perspective period

## Experience

### NoMachine

Wrocław, PL

FULL-STACK WEB DEVELOPER

December 2023 – Present

- Creating and maintaining visually appealing and performance-effective websites
- Designing and programming user interfaces in React, creating components, and ensuring responsiveness
- Debugging and resolving technical issues across the stack
- Designing and implementing backend services with pure PHP
- Using version control systems like Git to track code changes

### E-commerce Application

INTERNSTORE

- E-commerce platform using cutting-edge technologies including Next.js, React, Tailwind CSS, Firebase and Redux. This project shows cases my expertise in building high-performance web applications with a focus on user experience and data management

### Portfolio Website

NOVACCI.PL

- Dynamic portfolio website using React and SCSS, which not only features a sleek dark mode design but also incorporates the i18n protocol for language switching. Additionally, I connected the website to the Spotify API, enabling users to view my current music preferences in real-time

## Skills

### Frontend

- Breakdown and implementation of the interface into components
- Using the axios library to make HTTP requests to the server
- Process the received data and display it in the interface components
- Contact translators and add additional languages to the application
- Implementation of the new features such as dark mode or chat bots
- Creating forms with validation through the use of React Hook Form

### Backend

- Configuring the server environment
- Create routing and define paths and handling of HTTP requests
- Creation of data models
- implementation of services, middleware and controller for user login and verification
- Basic error handling

## Tools

**Programming Languages:** JavaScript, TypeScript, PHP

**Frameworks and tools:** ReactJS, NextJS, NodeJS, ExpressJS, Redux, Tailwind, Material UI, Sass

**Databases:** MySQL, FirebaseDB

**Other relevant skills:** GIT, Postman, NPM, PNPM, VisualStudioCode

**Languages:** English (proficient), Polish (native), Germany (basic)

I hereby give consent for my personal data included in my application to be processed for the purposes of the recruitment process under the Personal Data Protection Act as of 29 August 1997, consolidated text: Journal of Laws 2016, item 922 as amended.
